For Immediate Release

Jack Wells from Dorchester

University of Plymouth BA Product and Furniture Design

SUN SHELL LAMPSHADE

The Sun Shell is a biomimetic-inspired lampshade that playfully distributes light to create vibrant tessellations on all surrounding surfaces. All of the steam bent ash rings can be rotated to create different forms and therefore various light patterns.

Created from locally-sources ash to reduce transport costs, the Sun Shell is designed for batch production requiring only 3 simple jigs. The screw-in backplate makes it easy to install in any household. Finished with raw linseed oil, the natural wood grain shines through for a sophisticated aesthetic.
